- Project, program and construction management
- Construction, technical services and commissioning
- Maintenance, turnarounds, retrofits and revamps

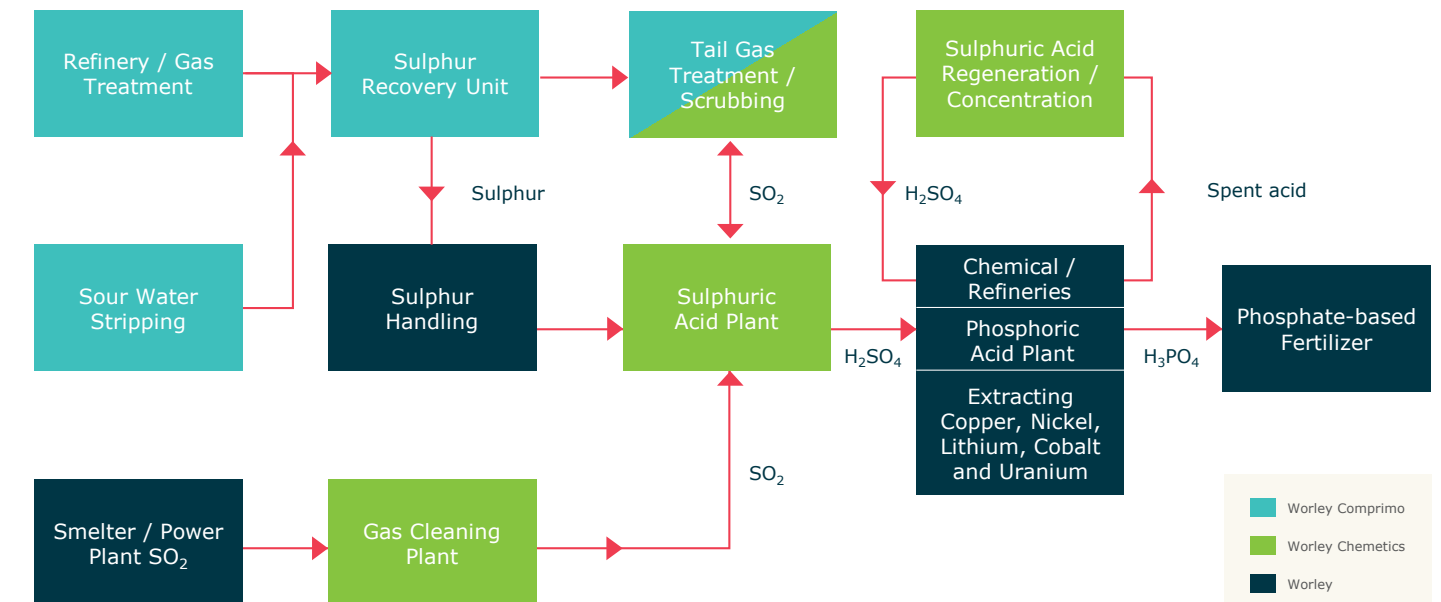

Bringing the expertise to deliver all your sulphur projects

ABOUT WORLEY COMPRIMO

Worley Comprimo is a global provider of gas treating and sulphur recovery technology focused on reducing emissions, increasing site reliability and improving plant economics. For over 60 years, our technology has been at the forefront of sulphur recovery, featuring in more than 1,200 sulphur recovery units worldwide.

ABOUT WORLEY CHEMETICS

Worley Chemetics is a global technology, solutions and equipment fabrication provider for sulphuric acid, chlorine chemicals and other specialty chemical facilities. Our specialized equipment, systems and plants help our customers to achieve higher capacities and reliability, lower operating costs, decrease emissions, improve safety and maximize long term profits.

Together, we deliver technologies for all forms of sulphur species, from H₂S to sulphur, sulphur via SO₂ to sulphuric acid and sulphur handling and transportation.

Our tailored solutions enable our customers to globally manage their sulphur species resources and convert waste into maximum profits — with unparalleled reliability and complete project execution from the early days feasibility, to the full EPC services, including LS supply through the Worley group.
